## Truth-In-Savings Disclosure

- RATE INFORMATION.** The dividend rate and Annual Percentage Yield on your accounts are as written above. The Annual Percentage Yield is a percentage rate that reflects the total amount of dividends to be paid on an account based on the current dividend rate and frequency of compounding for an annual period. The dividend rate and the Annual Percentage Yield may change monthly as determined by the Credit Union Board of Directors.
- NATURE OF DIVIDENDS.** Dividends are paid from current income and available earnings after providing for required reserves. The dividend rate and Annual Percentage Yield are the prospective rates and yields that the Credit Union anticipates paying for the applicable dividend period.
- CREDITING AND COMPOUNDING.** Dividends will be credited monthly. Dividends will be compounded or distributed as elected by you and as stated on your certificate voucher. Dividends credited to the certificate at the end of each dividend period become principal and are subject to early withdrawal penalty.
- ACCRUAL OF DIVIDENDS.** The dividend period begins on the first calendar day of each month and ends on the last calendar day of each month. Dividends begin to accrue on cash deposits and non-cash deposits on the business day you make the deposit to your account. Dividends accrued during the final period will be paid at maturity and not at the end of the dividend period.
- BALANCE INFORMATION.** Interest is calculated on the average daily balance method, which applies a periodic rate to the average daily balance in the account for that period. The average daily balance is determined by adding the principal amount in the account for each day of the period and dividing that figure by the number of days in the period.
